

E-SAFETY

The internet can be many things. Useful, helpful, fun, and dangerous. Many people are online, trying to get details or hack into computers. So that is why **EVERYONE** needs to be careful. Never go on websites you've never heard of or not sure about. You don't know what's on there. Many people, (adults AND children) in the past, have been and harmed in different ways, including identity theft and fanatical theft. All of these are because the victim has either been tricked into giving away details, such as where they live, and their credit card details, or been careless. These are great examples of people not being safe online. That's the reason for the websites below.

The government provide such websites as:

www.direct.gov.uk/en/parents , which provide guidance for parents and children.

Also the UK council for child internet safety (UKCCIS).

www.education.gov.uk/ukccis

How safe are you online? Take the E-Safety IQ test on:

www.saferinternet.org.uk

If you want to learn how to be good friends, or take care of yourself online, go to: www.minimentors.org.uk (5-11 years).
